

Vale Brothers Limited

Environmental Policy

Prepared 2018

Vale Brothers Ltd – Environmental Policy Statement

The company recognises and supports the need to conserve vital resources, and is committed to seeking the best and most efficient use of energy and resources consistent with related economical and environmental implications.

The company's objective is supported through the adoption of this policy and implementing the actions contained within it.

Where economically and technically feasible, this objective is supported through:-

- Establishing the highest environmental standards and continually aiming to minimise any any lasting impact on the environment by the actions of the company
- The company complies with environmental legislation where it exists and adopts responsible standard where there is no legal requirements.
- The company considers the most efficient life cycling and re-cycling of all its products and equipment within their design and use features.
- The company as far as it practical designs out any avoidable use of environmentally unfriendly chemicals and gases
- The company continually strives to improve its methods and operations to prevent or reduce the generation of waste. In the event of a necessity to dispose of any waste, the company will use licensed facilities only.
- The company continually strives to improve its efficient use and management of energy consumption and by-product generation and emission.
- The company adopts an environmental purchasing policy for goods and services particularly those involving natural resources to be obtained from renewable and wherever possible local sources.
- The company adopts continual processes the monitor the environmental efficiency of the company's operations.
- The company continues to raise the environmental awareness of its employees, and customers. From time to time this may involve training as well as fact sheets and advertising literature. The company is committed to work flexibly with all clients in the development of any specific environmental requirements.

If you have questions on the above, please do not hesitate to contact the company director Mr. P W Wilkes, who is responsible for the company's part in environmental management.
